

- The HalfDome2 is available in two versions; silver interior and white interior. **Silver can be used with hot or strobe lights. White is designed for strobe exclusively.**
- The slim profile of the HalfDome2 produces the narrow band of light useful in product photography.
- It also makes a great hairlight for group portraits.
- The inner baffle eliminates hot spots and is removable to accommodate lighting from very soft to high-contrast.
- QRC™ (Quick Release Corners) make set-up and break-down quick and easy.
- Aluminum-tipped steel support rods offer strength and durability.
- Extensive Quality Control process ensures a perfect product.
- Our softboxes come with their own Carry Bag for easy transport and storage.

HalfDome2 is available in two sizes.

All Photoflex Softboxes require a connector (not included).
