RE: BeachTek announces the DXA-FX adapter for the Sony HDR-FX1 camcorder

TORONTO, ON CANADA – Nov. 14th, 2005 – BeachTek announces its latest adapter exclusively designed for the popular Sony HDR-FX1 HDV camcorder. The DXA-FX is a two channel, battery powered microphone adapter with built in low noise preamplifiers and fast acting limiters. The preamplifiers provide added gain and improved signal to noise for low output dynamic or condenser microphones while the virtually “unclipable” limiters ensure distortion free audio from overly hot inputs. Product is now shipping in limited quantities. The suggested list price of the DXA-FX is \$349.00 in the United States.

The DXA-FX is the ideal front end for the Sony FX1 camcorder. The adapter is very easy to set up and use and requires a minimal amount of fuss. Its rugged construction ensures years of use and its compact size fits perfectly under the FX1 camcorder. The DXA-FX provides flexibility and control over the audio signal to ensure the best possible audio recording to match the superior video quality of this fine camcorder.

BeachTek is the original and most popular maker of XLR adapters for DV camcorders. The company specializes in making unique audio accessories for the demanding videographer.

BeachTek is located in Toronto, Ontario Canada. For additional information on BeachTek or the products that they offer, including full specifications on the DXA-FX, visit their web site at www.beachtek.com or call (416) 416-690-9457.
